The Meridian product line from Lenmak Exterior Innovations Inc is a panel for the times. Architectural freedom using an innovative recessed reveal for three-way or four-way intersections of panels with unrivaled ease of install takes this panel into its own league of design. Two standard panel widths paired with virtually unlimited length options offer bold modular solutions to even complex facades.

Advantages

Design

- Bold, strong & innovative; mix & match widths & lengths at will for a one-of-a-kind layout
- Perfect-width cutting maximizes yield without creating waste
- Use a little or a lot; blends seamlessly with other products & finishes

Colour

- 30 different standard pre-finished colours
- Available in standard & metallic colours for use as accents or full exteriors

Time

- Lean manufacturing and a dedicated Special Projects team enable custom orders to be produced quickly
- Short lead times and manufacturing flexibility reduce carrying costs and site delays
- Repairs are made easy by skinning over panels - no costly removal and re-installation required

Price

- Automated inventory management system & pre-programmed folding machines produce perfect panels
- Single-skin aluminum with industry-leading finish warranties offer a virtually maintenance-free exterior and long service life, reducing cost of ownership

Sustainability

- Panels are produced from aluminum which includes both pre- and post-consumer recycled materials (possible LEED credits) and remain 100% recyclable at the end of their service life
- No harmful toxins and zero VOC emissions maintain interior air quality and reduce carbon footprint
- Customized design & on-demand production minimizes waste and conserves energy
