ShadowClad Prime

ShadowClad Prime Panel Systems by Lenmak Exterior Innovations Inc. offer a sleek, low-cost alternative with concealed-fasteners. Three panel widths, available recessed reveal, & stiffening rib options create visual interest. A wide range of prefinished steel colours & in-house cut-to-length coil processing ensure a perfect fit for every project.

## Advantages

### Design

- Cut-to-length & slaying capability offers flexibility in pane lengths to suit many applications
- Available reveal & stiffening rib features allow customization at no additional cost
- Easily integrates with surrounding exterior products & fully adaptable to existing wall conditions

### Colour

- Available in 22ga or 24ga prefinished steel & galvalume
- 13 standard (SMP) colours, 12 premium (PVDF) colours & 19 naturclad colours
- Industry-leading high-durability finishes meet or exceed architectural standards for interior & exterior applications
- All colours offer matching prefinished steel trim in pre-programmed profiles for one-stop ordering, or available custom trim details to suit special circumstances

### Time

- Lean manufacturing & in-house master coil processing reduces lead time & minimum order size
- Proprietary robotic inventory management allows flexibility to add small quantities from sheeted inventory
- Online ordering system shortens processing time for quotes & orders, preventing costly errors & lost time on-site

### Price

- Available in standard & premium finishes to ensure best value for each specific project
- Produced to exact lengths to minimize on-site modification & waste created during installation

### Sustainability

- Panels contain a minimum of 30% recycled content; 24% post-consumer and 6.8% post industrial (possibility for LEED credits 4.1 or 4.2)
- Local manufacturing and sustainable practices reduce carbon footprint

## Keep it on the straight & narrow.

ShadowClad Prime panels are suitable for vertical cladding as well as soffit applications. Available in multiple applications (see table below for detail).

### ShadowClad Prime Cladding

- Recommended installation over steel girt or Thermal Max clip
- Male/Female interlocking edges conceal fasteners for a sleek contemporary look
- Available up to 21' long\* for a visually seamless installation
- Colour-matched flashing components maintain building envelope & drainage requirements with style
- Designed to optimize value vs cost without loss of aesthetic appeal

### ShadowClad Prime Panel as Soffit

- Ideal for commercial applications
- Available 1¼" venting strip accommodates air-flow requirements even on projects with complex roof systems
- Fasteners are entirely concealed by adjacent panels & surrounding materials
- Can be run parallel or perpendicular to wall to suit aesthetic requirements of every job

Single vent dual ribs profile

Single ribs profile

Panel Type	Material	Standard Width	Standard Depth	Standard Reveal Size	Length	Orientation	Options
ShadowClad Prime Wall Panel	22ga SMP, PVDF finishes, 24ga only available in NaturClad or Tex finishes	6" including reveal	1"	1/8" Reveal	36" (3') Min. 252" (21') Max.*	Vertical or Horizontal	Vented
		8" including reveal		1/8", 1/4", 1/2", 1" or no reveal			Vented, 1 Rib
		12" including reveal					Vented, 1 or 2 Ribs

\*Extremely long panels may require stiffening ribs and/or reveals between panels to accommodate expansion/contraction & maintain system & aesthetic performance. Consult Lenmak's Project & Design team for application-specific limitations on panel length & appropriate trim/accessory details.
